

## The Best Day

Even I have to admit it  
Something great has been going on  
Ever since I got up this morning  
It's been happening all day long

When I add it all together  
Including but not limited to  
The ocean and friends cold beer and warm winds  
And looking up and seeing you

So if nothing bites my leg off in the next five minuets  
And I don't drown in the sea  
I'm gonna go ahead and say  
This is the best day  
That's ever happened to me

We all pooled our money together  
And we made a lot of sangria wine  
Put the iPod classic on shuffle  
Cut off the cell phones and the land lines

Everyone who said they might come made it  
And I believe we would all agree  
By the end of the day each in our own way  
Had achieved immortality

Every now and then if you let it  
Everything will be ok  
Don't stop and look back or regret it  
Just have yourself a very best day

So if nothing bites my leg off in the next five minuets  
And I don't drown in the sea  
I'm gonna go ahead and say  
This is the best day  
That's ever happened to me
