

*shut up and talk to me*

*love will never be be a solid bet*

*it's kinda like working without a net*

*don't be afraid to let your feelings out*

*that's what loving is all about*

*come on baby now gimmie a break*

*it's how you not how you think*

*stop rattling your keys*

*shut up and talk to me*

*i think i've known you long enough to know*

*there's nothing you can hide that still don't show*

*you ain't fooling anyone but you*

*when you put me through what you put me through*

*come on baby now tell me the truth*

*i need a chicken fried stake not a baby Ruth*

*i'm not that hard to please*

*shut up and talk to me*

*you can talk about the weather till it drives me nuts*

*rattle on about the who why and what's*

*a conversation wouldn't hurt that much*

*a little something wit a human touch*

*if you're hurting baby let me know*

*you need attention just tell me so*

*i'm not the one you should be hiding from*

*it doesn't matter what the ever you done*

*you can have your cake and eat it too*

*that's the kind of stuff i want from you*

*how hard can it be*

*shut up and talk to me*
