

Don't Go Away

I've never been too lonesome, never been too sad
Never had as much fun as all the fun we had
Baby please stay with me you know I want you to
But either way you go I'm better off because of you
Don't go away

Reflections lit the river from the city's silver lights
And we walked close together on that warm summer night
And I never felt so young when we climbed down the bluff
And laid down by the river where words were not enough
Don't go away

I've never been too lonesome, never been too sad
And I've never took the chances for the good or for the bad
But baby please stay with name you know I want you to
But either way you go I'm better off because of you
Don't go away
