

I Couldn't Love You Better

I've had the lonely night surround me
Needed someone like you around me
And I found the golden rule a simple understanding
And set aside for me and you
A love so undemanding
I couldn't love you better
You are the star shine in the sky
I couldn't love you better
But baby I'm gonna try

And when we're alone at last together
We'll look for a love to last forever
Think of all that we've been through just to come this far
Think of all the things we'll do just staying with each other
I'm so glad that I have found you
I finally found you

I couldn't love you better
I couldn't love you better
I couldn't love you better
But baby I'm gonna try
