Say I

I know we just met each other I know it's moving too fast But at the rate we are going I guess I may as well ask

If you wanna hug me If you wanna love me If you wanna hold me Look in my eyes

And if you want me say I love you if you want me say I love you if you want me say I love you Say I

I think it's get'n too smokey How 'bout a little fresh air I got a place around the corner I got some etchings up there

We'll take it easy baby Ain't gonna tease you baby It it's too sleazy baby You don't have to stay

But if you want me say I love you If you want me say I love you If you want me say I love you Say I

We'll take it easy baby Ain't gonna tease you baby I wanna please baby I got a bundle of love

But if you want me say I love you If you want me say I love you If you want me say I love you Say I

Love you

If you want me say I love you If you want me say I love you If you want me say I love you If you want me say I love you If you want me say I love you If you want me say I love you If you want me say I love you

If you want me say I love you
