

Your Love

Your love
Is something that I'm sure of
It's something I can cling to
In the middle of the night

It's something I can lean on
it's something I can dream on
It's something I can hang my heart on too

When I'm away from you I count the hours
Till I'm gonna be alone with you
There were others girl but that don't matter
'Cause I only wanna be with you

And your love
I'll never get enough of
It's all that can think of
In the bottom of the night

It's something that I'm sold on
That I can get a hold on
And never grow cold on loving you

Umm yeah
You suit me so well
Any fool can tell
I'm under your spell

It's something that I'm hooked on
That I could write you books on
When you look at me babe
What you see is your love

So come on baby on baby put your arms around me
Show me feeling that I can't replace
Come on baby let me feel that magic
That I only get from your embrace

And your love
Is something that I'm proud of
It's something I can build on
The rest of my life

It's gonna take a power
To crumble our tower
When you look at me babe
What you see is your love

Umm your love
Your love
Your love
Is so important to me
Your love
Umm your love
