

Let It Roll

This is the dawning of a new time
we shouldn't wait another day
we got people needing people
let's throw the hate and fear and bitterness away

we have a chance we should be taking
there is a place where we can go
where everyone can come together
try to understand your fellow man and let it show

let it roll let it roll let it roll
let it live in your heart and your soul
so many things divide us
why not find a way to make us whole
let it roll let it roll let it roll

let's put the girls and boys together
and let their laughter fill this place
why not take all our woes and worries
put 'em all on a rocket and shoot 'em in to outer space

let it roll let it roll let it roll
let it live in your heart and your soul
so many things divide us
why not find a way to make us whole
let it roll let it roll let it roll

half a million years of evolution
every generation needs a new solution
find a big box for the soul pollution
and keep it under lock and key

let it roll let it roll let it roll
let it live in your heart and your soul
so many things divide us
why not find a way to make us whole
let it roll let it roll let it roll
